Message from the Comprehensive Committee Chair

Dear Patients, Community Members and Colleagues:

Despite continued challenges from COVID-19, AdventHealth Cancer Institute Waterman continued to provide high-quality care to the residents of Lake County. And, the cancer program continued to grow. The following accomplishments were achieved in 2022.

New Team Members — Physicians

Alaa Iskandar, MD
Pulmonologist

Shivam Kharod, MD
Radiation Oncologist

Venkata Marella, MD
Urologist

Ryan Moncman, DO
Neurosurgeon

Terry Olivas, MD
Cardiothoracic Surgeon

Dan Tran, MD
General Surgeon

New Team Members — Clinical Staff

- **Ryan Belen, MBA, RT** Radiation Oncology Manager
- **Amanda Caceres, MMSc, LCGC** Genetic Counselor
- **Jennifer Christakis, CTR** Certified Tumor Registrar
- **Gracie Da Silva, MSW** Oncology Social Worker
- **Ashley Decker, RT** Radiation Therapist
- **Radha Sukhu, MSc, MS, GC** Genetic Counselor

Clinical Care

- In March, AdventHealth Waterman transitioned to a new electronic medical record system, Epic, which provides clinicians access to important patient information for clinical care.
- The Lung Nodule Clinic for rapid diagnosis and follow-up of suspicious lung nodules was launched in August under the leadership of pulmonologist Dr. Ryan Schroeder (pictured right) and with the support of lung navigator Janet Moore. This unique, lifesaving program allows lung nodules identified on imaging scans to be evaluated rapidly to determine the appropriate follow-up and provide timely treatment if a nodule is cancerous. From August through December, 71 patients were assisted through the clinic and two lung cancers were diagnosed.
- Waterman launched its neurosurgical program by recruiting neurosurgeon Dr. Moncman and now offers surgical treatment for brain tumors.

Mission

- Mammogram screenings and transportation assistance were provided to underserved patients through funding from the AdventHealth Waterman Foundation.

These and many other achievements demonstrate the dedication of our cancer team in achieving our vision to provide comprehensive, quality care.

In partnership with our physicians, the community and donors, we will continue to focus on our commitment to providing the highest quality, state-of-the-art cancer care close to home for members of our community.

Regards,

A handwritten signature in black ink, appearing to read 'Borys Mascarenhas'.

Borys Mascarenhas, MD

Chair, 2022 Comprehensive Cancer Committee
Medical Director of Cancer Clinical Quality
Breast Program Medical Director

Vision

Since its establishment in 1938, AdventHealth Waterman has been a leading provider of health care in Central Florida. The AdventHealth Cancer Institute Waterman continues to expand its services, offering the growing Lake County population easy access to the latest

advances in cancer care. Our vision is to grow and enhance oncology services to be recognized as Lake County’s leading provider of choice for comprehensive and high-quality cancer care.

About The Cancer Institute

From diagnosis to recovery, AdventHealth Cancer Institute Waterman offers innovative state-of-the-art health care. Our oncologists are experts in cancer care, having trained at top medical schools, and in other prominent hospitals and institutions. And through AdventHealth Cancer Institute, we connect Lake County to a network of care that ensures access to additional cancer specialists and technology.

But state-of-the-art doesn’t refer only to technology. Our physicians and staff are dedicated to caring for each patient with compassion. Our team embraces the AdventHealth service standards that focus on the whole care experience of each individual — physical, emotional and spiritual, resulting in a unique health care experience.

The Cancer Institute is accredited as a Comprehensive Community Cancer Program by the Commission on Cancer of the American College of Surgeons, and our breast program is accredited by the National Accreditation Program for Breast Centers. This means that we meet the highest national standards in comprehensive patient-centered and quality care. At AdventHealth Cancer Institute Waterman, patients can stay close to home — connected to their families and the community — while receiving the latest cancer treatments and therapies.

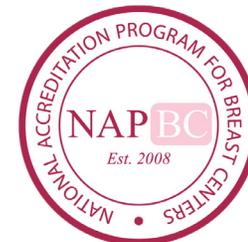

AdventHealth Cancer Institute Waterman’s patient satisfaction scores are consistently in the 90th percentile and above when compared to other institutions in the country. In 2022, our cancer patient-experience surveys revealed that 99.2% of patients would recommend AdventHealth Cancer Institute Waterman to friends and family members for cancer care.

The best health care engages the body, mind and spirit, and each contributes to healing. That’s why we invest in people and technology, from our state-of-the-art equipment that targets tumors with pinpoint accuracy, to cancer care navigators who provide patients with emotional support to overcome the hurdles during cancer treatment and recovery.

Summary of Services

Comprehensive Cancer Center

Offering Cancer Services in One Convenient Facility

Oncology Specialists:

- Chemotherapy/infusion
- Clinical research trials
- Financial counseling
- Genetic counseling and risk assessment
- Hematology
- Medical oncology
- Navigation
- Nursing — inpatient and outpatient
- Nutritional counseling
- Oncology social work
- Otolaryngology
- Palliative care
- Pathology
- Pastoral care
- Patient support groups and education
- Pulmonology
- Radiation oncology
- Radiology
- Reconstructive surgery
- Rehabilitation
- Surgical oncology/surgery
- Survivorship care
- Tumor registry
- Urology

National Leaders in Breast Care

Lake County's Only NAPBC-Accredited Cancer Center

Monitoring your breast health is essential. From 3D mammography and genetic testing to a world-class, multi-specialty care team, AdventHealth Waterman offers the leading methods for early detection of breast cancer along with the most advanced treatments. And, with comprehensive support groups and survivorship programs, we're here for you in body, mind and spirit.

Cancer Care Navigators

Eileen Bascombe, RN, BSN, ONN-CG

Cancer Care Navigator
Breast

Janet Moore, RN, BSN

Cancer Care Navigator
Lung

**Charissa Wynn, RN, BSN,
OCN, ONN-CG**

Cancer Care Navigator
Colon/Prostate/Other Tumors

Waterman's Cancer Navigation program is the only one of its kind in Lake County, offering a unique, complementary service to support patients throughout the diagnosis and treatment process. Our three cancer navigators are specially trained, nationally certified oncology nurses who serve as liaisons between patients and their medical teams during treatment and recovery. These nurses provide patients with individualized education about treatment options to support patients in making informed decisions about their care. They also help by expediting appointments with our team of cancer specialists and connecting patients with resources for financial assistance, psychosocial support and more. In 2022, our navigators assisted

524 cancer patients and distributed survivorship care plans to forty-one breast cancer patients.

Radiation Oncology

AdventHealth Cancer Institute Waterman offers the latest innovations in radiation oncology to ensure patients have access to the safest, most effective radiation care.

Our cancer institute specializes in treating oligometastatic disease, where a patient has only a few small areas of metastases (cancer cells that have spread from one location in the body to other parts of the body). Historically, these patients were treated with systemic therapy (i.e., chemotherapy) alone. However, recent studies have shown that treatment with local therapies such as radiation and surgery may be able to extend a patient's life beyond what would have been possible with systemic therapy alone. Treating oligometastatic disease requires extremely sensitive imaging capabilities and precise radiation delivery techniques such as the state-of-the-art technology used at Waterman.

We also specialize in advanced high-dose-rate (HDR) brachytherapy for skin and prostate cancers. Brachytherapy is a minimally invasive method of internal radiotherapy that delivers concentrated doses of radiation while keeping healthy nearby tissues safer. This type of radiation is placed directly into or next to a tumor. It allows the radiation oncologist to direct the radiation dose to a smaller area in a shorter time compared to external radiotherapy.

Additional innovative radiation technologies include:

- Image-guided radiation therapy (IGRT)
- Intensity-modulated radiation therapy (IMRT)
- Deep inspiration breath hold (DIBH) therapy
- Accelerated partial breast irradiation (APBI)

- Prone breast irradiation
- 3D conformal radiation
- Conventional radiation
- Stereotactic body radiotherapy (SBRT)
- Stereotactic radiosurgery (SRS)
- Gated RapidArc radiotherapy
- Surface-guided radiation therapy (SGRT)
- Space OAR gel

Our large bore, dual-energy CT imaging scanner allows radiation treatment to be administered in a manner that tracks with the patient's respiratory movement, resulting in more accurate treatment to the tumor. In addition, with dual energies, the scanned images are much clearer, making it easier to distinguish between normal tissue and the tumor. For patients with metal implants, such as hip prostheses, dual-energy scans can reduce or eliminate the visual on the scans caused by the implants. This results in a radiation dose calculation that is more accurate.

These innovative technologies and others like the TrueBeam™ linear accelerator (a radiotherapy system that uses synchronized imaging and dose delivery to deliver radiation faster with less radiation exposure to the patient) make AdventHealth Waterman a leader in bringing new cancer treatment techniques to Lake County.

Medical Oncology

Medical oncologists at AdventHealth Waterman treat patients using the latest advances in personalized medicine. New medications and procedures have vastly improved quality of care and outcomes in many conditions. Immune therapy, targeted medication and cancer genetic studies have helped provide care locally to numerous patients in the past year. With access to these new advances and a strong relationship with local and national prominent cancer institutions and experts, advanced cutting-edge local care has become a reality.

Clinical Trials

Clinical trials are research studies aimed at evaluating if a new treatment, like a new cancer drug, is safe and effective. A clinical trial is often used to explore whether a new treatment is more effective and/or has less harmful side effects than the standard treatment. AdventHealth Cancer Institute Waterman gives patients the opportunity to participate in the newest therapies to fight cancer through a variety of clinical trials offered by our medical oncologists.

In 2022, 10 patients at AdventHealth Waterman were enrolled in clinical trials.

Oncology Nursing

Oncology care at AdventHealth Cancer Institute Waterman is provided by nurses with specialized knowledge and skills in cancer. From diagnosis, initial treatment, surgery and all aspects of cancer care, our nurses are trained in the unique physical and emotional needs of the cancer patient and their family. Nurses must be certified in oncology nursing and/or have specialized knowledge and skills in oncology. In 2022, 55 oncology nurses provided cancer care at Waterman.

Rehabilitation

At AdventHealth Waterman, we provide comprehensive oncology rehabilitation care. Physical therapy, occupational therapy and speech therapy are available to patients throughout the continuum of their treatment including acute care, inpatient rehab, home care and outpatient rehabilitation. The services provided include functional mobility training, patient and caregiver education, strengthening, reduction of soft tissue restrictions, lymphedema therapy, vestibular and balance training, and speech and swallow therapy exercises.

Nutritional Care

At AdventHealth Waterman, the Clinical Nutrition Services team provides individualized Medical Nutrition Therapy (MNT) to patients in inpatient, rehab and outpatient settings. The services provided include screening patients for nutritional risk, assessing nutritional needs, implementing an individualized MNT plan based on the patient's needs and care goals, providing nutrition education, and monitoring and revising MNT plans as needed. Cancer patients receive a complimentary outpatient visit with our oncology-trained registered dietitian. This helps cancer patients maintain and improve their nutrition to allow them to complete their cancer treatment in a timely manner.

Financial Counseling

AdventHealth Cancer Institute Waterman strives to reduce the stress and worry of the financial burden a cancer diagnosis often causes. Our specialized team assists patients, and their caregivers, with insurance authorizations, financial counseling support to address financial barriers to care, and with access to resources for assistance with transportation needs, insurance coverage, and disability and personal insurance paperwork.

Genetic Counseling

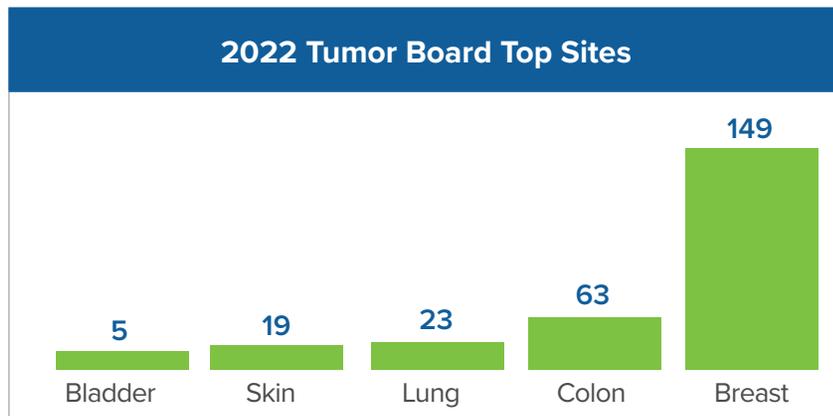

AdventHealth Cancer Institute Waterman offers access to certified genetic counselors. These specialists provide counseling on genetics and risk management to cancer patients. The genetic counselor collects family history, facilitates genetic testing and evaluation, interprets test results and tells patients about risk-appropriate management guidelines. The genetic counselor also facilitates genetic counseling and testing for family members of cancer patients.

Tumor Board

A multidisciplinary approach is often used to determine the most effective individualized treatment plans for our patients. Each week a team of our specialty physicians meets to review and discuss individual cases before recommending the best course of treatment. During these weekly tumor board meetings, each case is also reviewed against the Clinical Practice Guidelines established by the National Comprehensive Cancer Network (NCCN), an alliance of leading cancer centers. These guidelines offer additional clinical evidence and support to ensure our patients are receiving the best treatment options. The Cancer Institute also holds a weekly Breast Case Conference which is a tumor board dedicated to review of breast cancer cases.

Cases Reviewed at Tumor Board

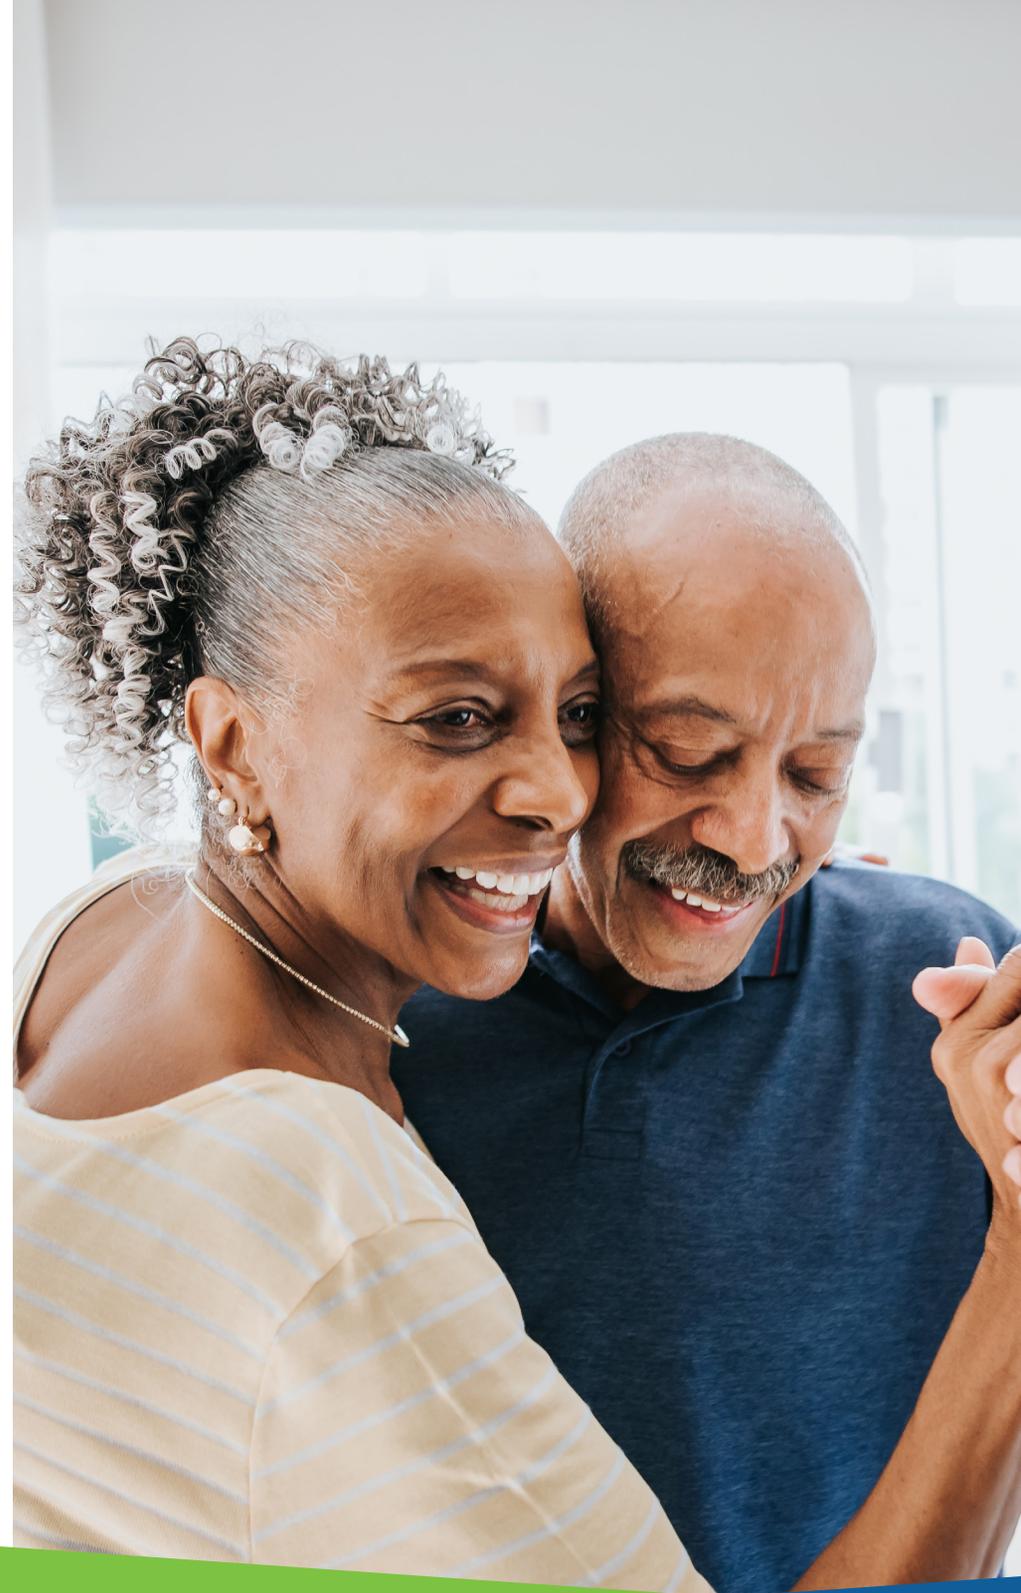

At AdventHealth Waterman, patients with complex cancer conditions are supported by a team of oncologists and other cancer specialists who collaborate at the Tumor Board to determine the best possible treatment plan for each patient. In 2022, 314 cancer cases were presented at Tumor Board. Breast cancer, the most diagnosed cancer, was the most frequently reviewed type of cancer at Tumor Boards.

Cancer Registry

Improving the survival and quality of life of our patients is our top priority. As part of our accreditation with the Commission on Cancer of the American College of Surgeons, AdventHealth Cancer Institute Waterman maintains a Cancer Registry. This information system allows us to track and compare our cancer outcomes and survival rates with other facilities across the country. The collective data helps us stay up to date on successful treatment trends and clinical trials, and guides us in designing programs to keep our community better educated about the importance of cancer screenings and prevention.

Primary Tumor Sites

Breast cancer was the most diagnosed cancer at AdventHealth Waterman in 2021, followed by digestive and respiratory cancers. Endocrine, connective and soft-tissue cancers were the least frequently diagnosed.

Ten Most Commonly Diagnosed Cancers

In 2021, of the ten most diagnosed cancers at AdventHealth Waterman, breast, lung and prostate cancers accounted for more than half of all cases.

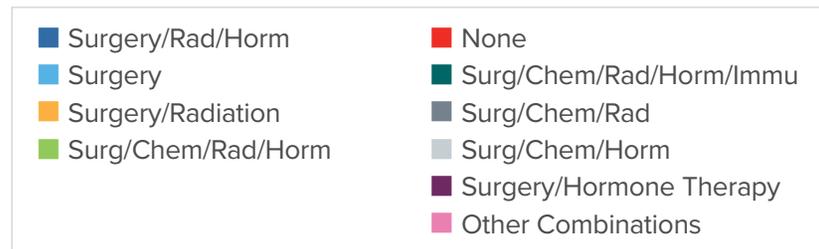

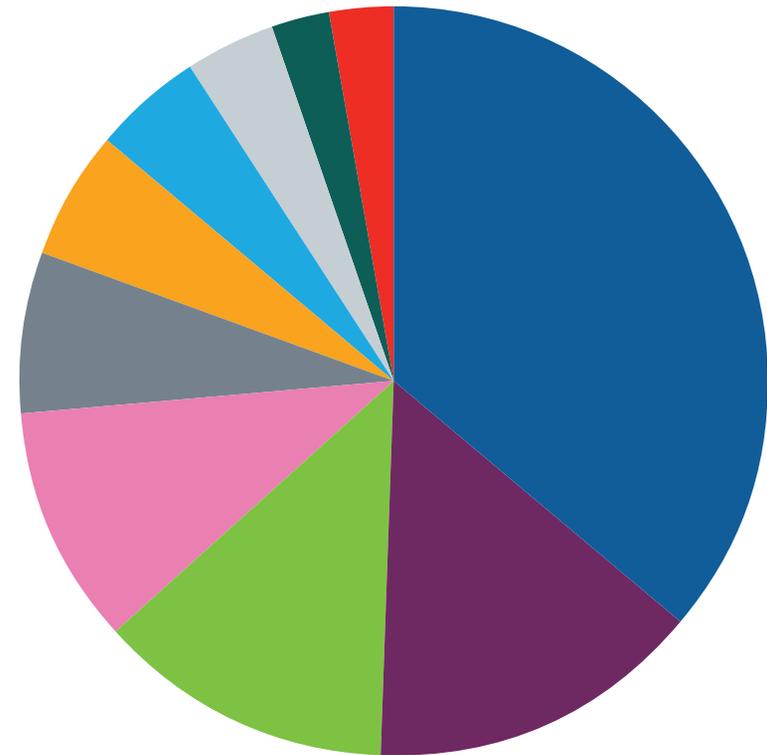

Source: AdventHealth Cancer Institute Waterman Cancer Registry

Breast: Treatment Combinations

The most common forms of treatment for breast cancer patients at AdventHealth Waterman in 2021 were surgery, chemotherapy, hormone therapy and radiation therapy.

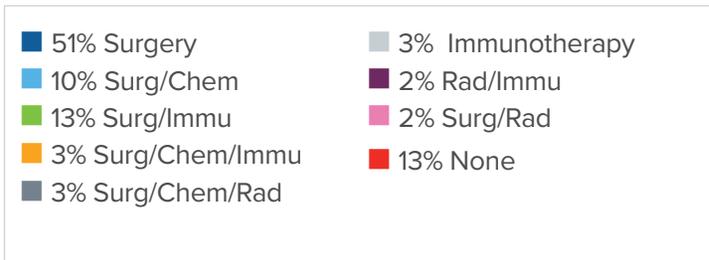

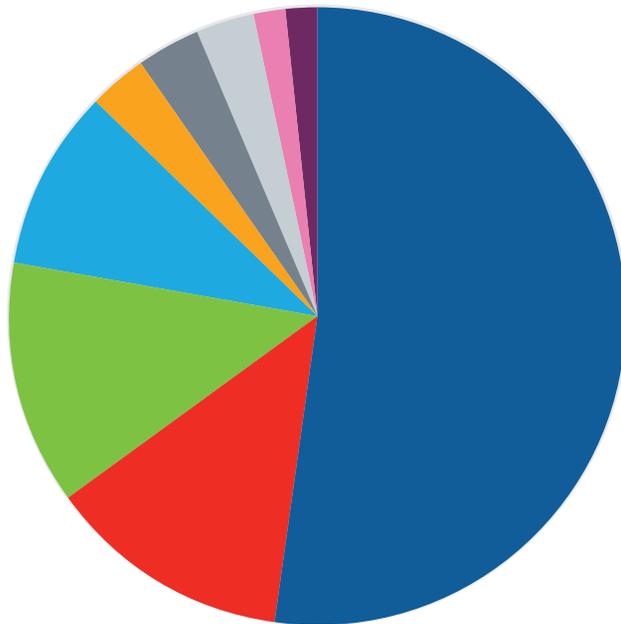

Treatment Type	Number of Cases	Percent
Total Cases	191	100.00%
Surgery/Radiation/Horm	69	36.10%
Surgery	11	5.80%
Surg/Chem/Rad/Horm	24	12.60%
Surgery/Radiation	9	4.70%
None	5	2.60%
Surg/Chem/Rad/Horm/Immu	5	2.60%
Surgery/Hormone Therapy	28	14.70%
Other Combinations	20	10.47%
Surg/Chem/Rad	13	6.80%
Surg/Chemo/Horm	7	3.70%

Source: AdventHealth Cancer Institute Waterman Cancer Registry

Bladder: Treatment Combinations

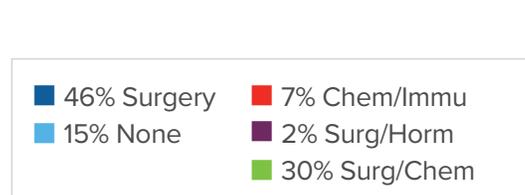

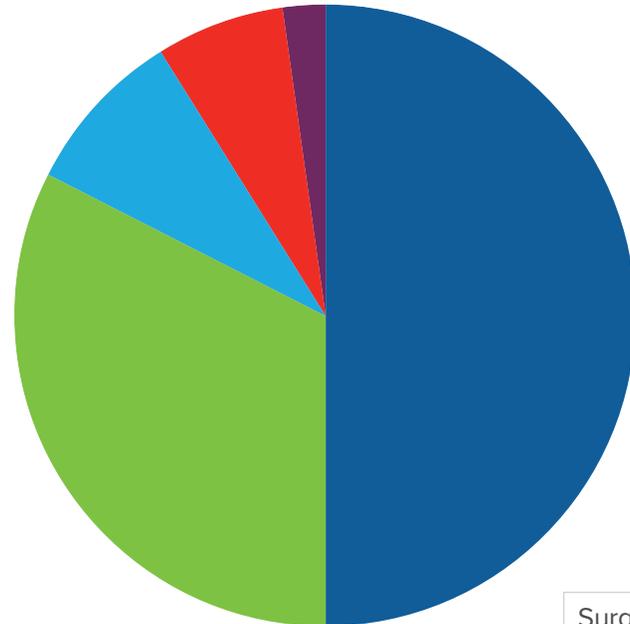

In 2021, 52 percent of patients with bladder cancer were treated with surgery at AdventHealth Waterman. Surgery combined with immunotherapy was the second most common form of treatment.

Source: AdventHealth Cancer Institute Waterman Cancer Registry

Colon: Treatment Combinations

In 2021, 46 percent of patients with colon cancer were treated with surgery at AdventHealth Cancer Institute Waterman. Surgery combined with chemotherapy was the second most common form of treatment.

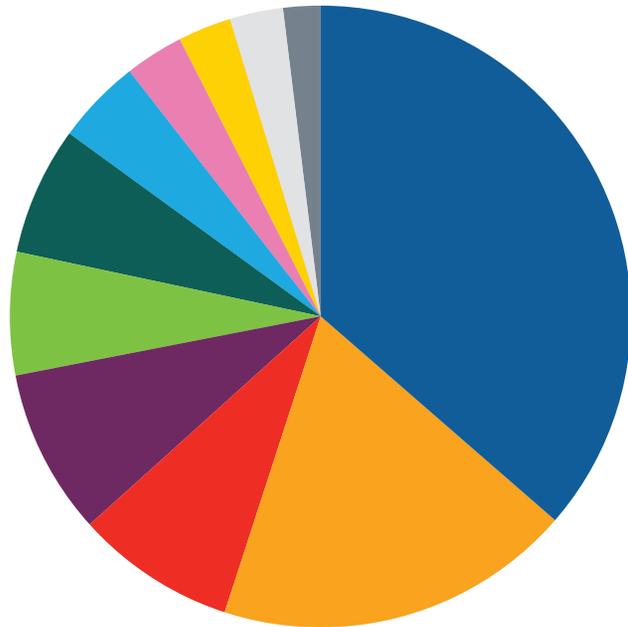

Surg: Surgery
 Horm: Hormone Therapy
 Rad: Radiation
 Chem: Chemotherapy
 Immu: Immunotherapy

Stage at Diagnosis

In 2021, most cancer patients seen at AdventHealth Waterman were diagnosed in the early stage (Stages 0-II). Often, when a cancer is diagnosed in an earlier stage, the cancer is more treatable. The stage in which the disease is detected often varies by cancer type.

Source: AdventHealth Cancer Institute Waterman Cancer Registry

Stage	Cases	Percent
Total	728	100%
0	78	11%
I	216	30%
II	98	14%
III	82	11%
IV	140	19%
UNK	61	8%
N/A	53	7%

Summary Stage at Diagnosis

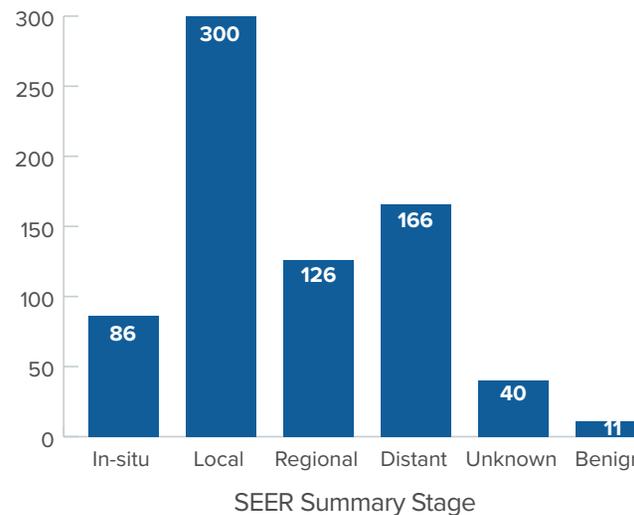

Of cancers diagnosed at AdventHealth Cancer Institute Waterman in 2021, 41 percent were discovered while the cancer was still localized to the area in which it originated. Of cancers diagnosed in 2021, 23 percent of patients were diagnosed after the cancer had spread to distant parts of the body.

In-situ: Abnormal cells present but have not spread

Local: Cancer limited to where it originated

Regional: Cancer that has spread to nearby tissue or body parts

Distant: Cancer that has spread to distant parts of the body

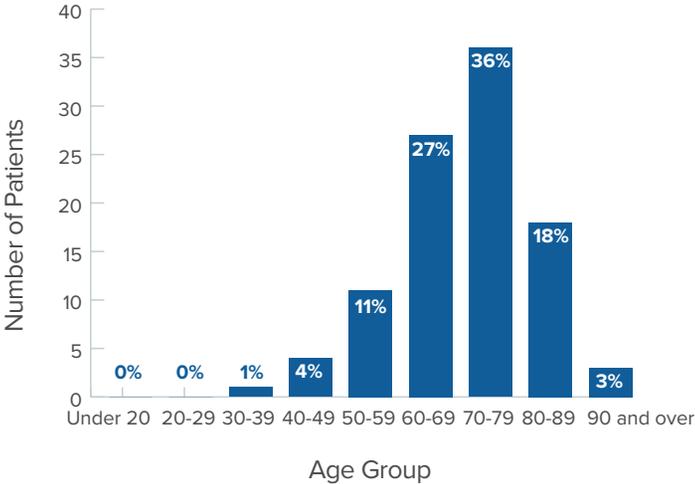

Stage	Cases	Percent
Total	729	100%
In-situ	86	12%
Local	300	41%
Regional	126	17%
Distant	166	23%
Unknown	40	5%
Benign	11	2%

SEER: The Surveillance, Epidemiology, and End Results Program of the National Cancer Institute (NCI) is an authoritative source of information on cancer incidence and survival in the United States.

Age at Diagnosis

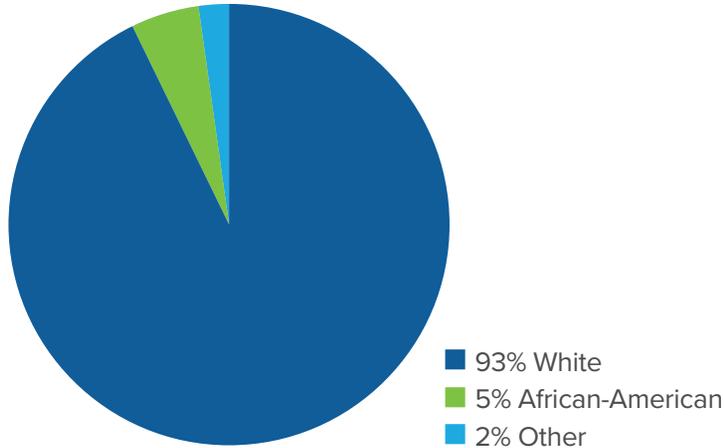

Cancer was most frequently diagnosed in patients age 70 to 79, followed by those 60 to 69 years of age.

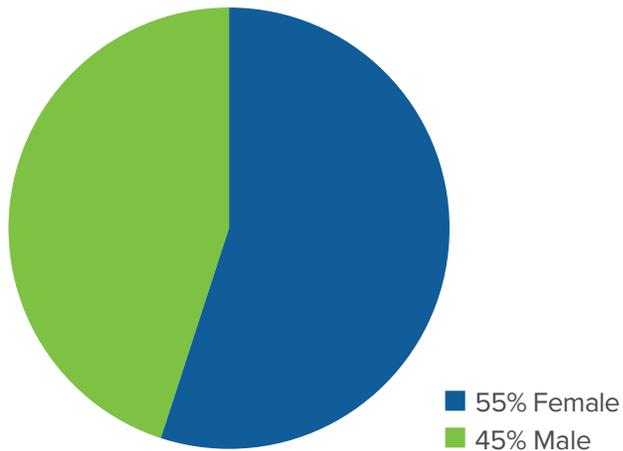

Source: AdventHealth Cancer Institute Waterman Cancer Registry

Diagnosis by Race

Diagnosis by Gender

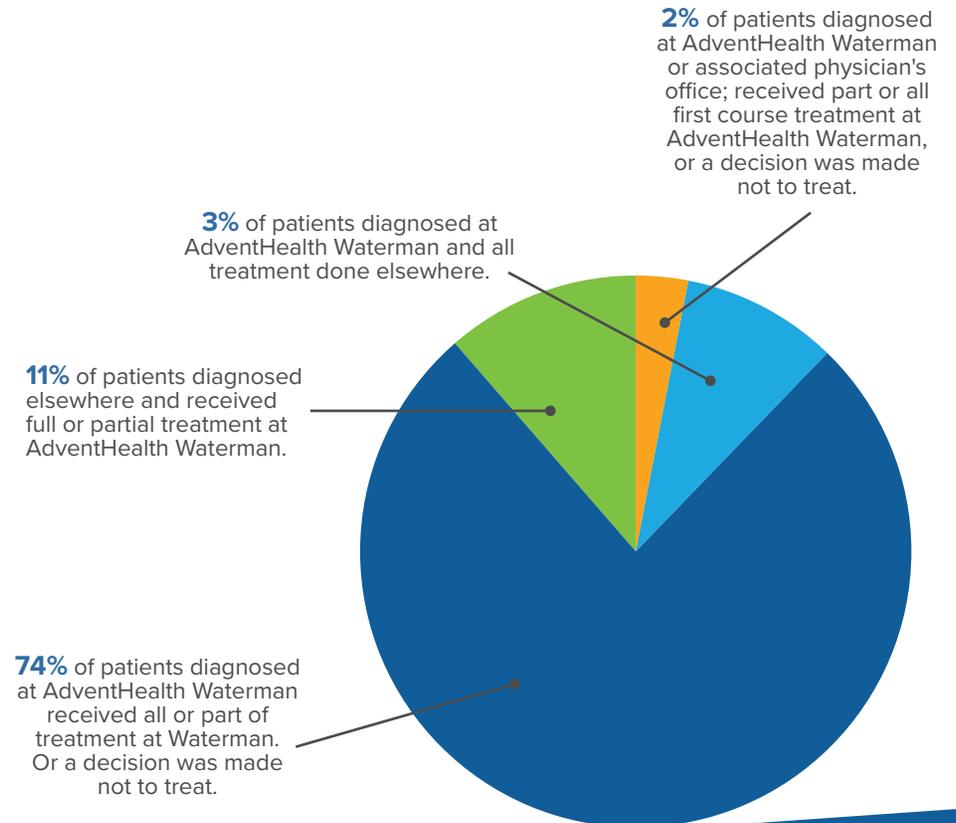

Source: AdventHealth Cancer Institute Waterman Cancer Registry

Diagnosis and Treatment Center

Eighty-nine percent of cancer patients diagnosed at AdventHealth Waterman in 2021 received part or all of their treatment at Waterman. Eleven percent of patients diagnosed at AdventHealth Waterman received all of their treatment elsewhere.

Class Distribution

Lung Cancer Program

In 2022, one key area of focus at AdventHealth Waterman Cancer Institute was our lung cancer program. Under the leadership of pulmonologist Dr. Ryan Schroeder, several key initiatives were implemented that resulted in the following outcomes.

Goal: Increase the number of low-dose CT (LDCT) screenings to detect suspicious lung nodules and lung cancer.

Initiatives: Held outreach events to educate the community on the importance of lung cancer screening and early detection. Out-of-pocket co-pay for LDCT screenings at Waterman was reduced.

Outcome: 337 LDCT screenings were performed in 2022 — a 28 percent increase over 2021.

Goal: Expand the number of pulmonary providers to offer timely appointments for patients needing initial lung evaluation.

Initiative: Recruited a second pulmonologist, Dr. Iskandar.

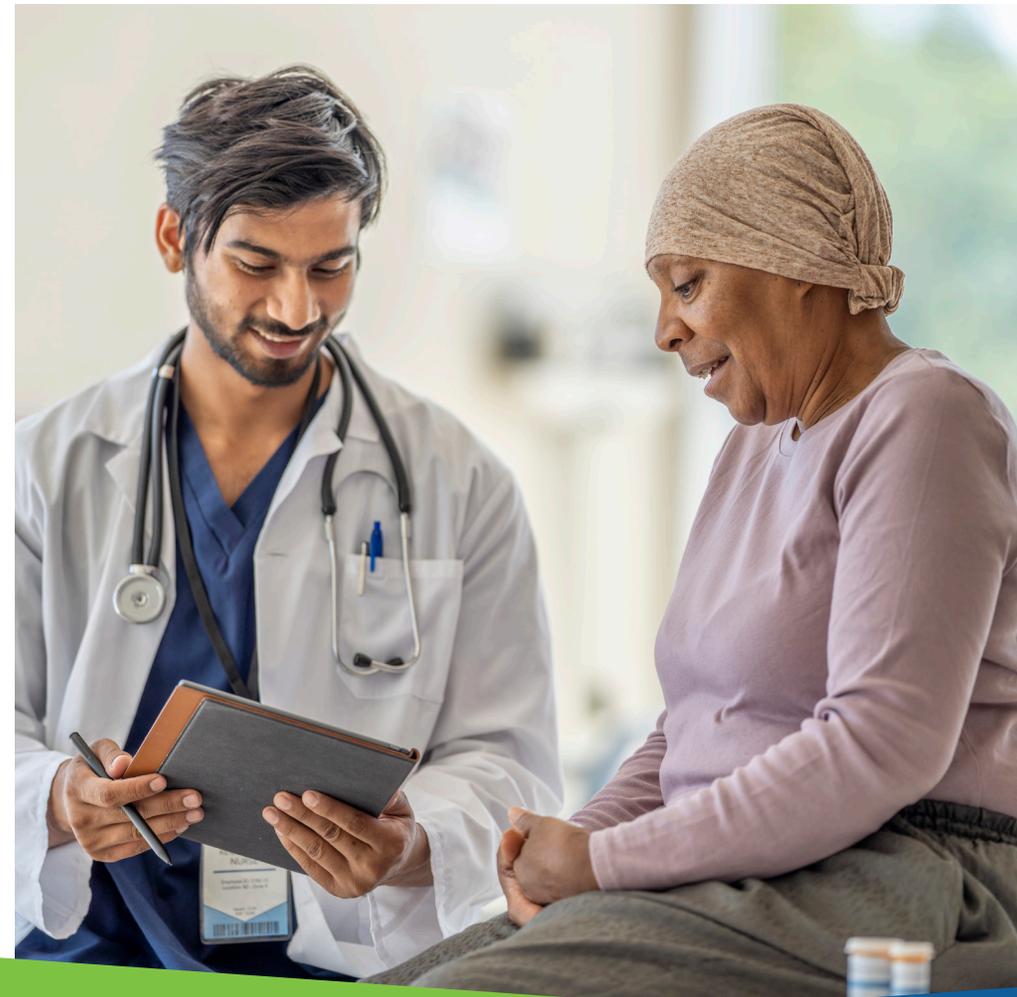

Outcome: Achieved an average of one to two days to initial pulmonary consult for new patients in 2022.

Goal: Implement a process to rapidly diagnose suspicious lung nodules and provide appropriate follow-up.

Initiative: Started Lung Nodule Clinic in August, including lung navigator follow-up with high-risk patients and rapid assessment and follow-up care by a pulmonologist.

Outcome: 71 patients with suspicious lung nodules were seen in 2022, with two lung cancers diagnosed.

AdventHealth Waterman is committed to continuous process improvement to provide quality care to our patients. The above efforts resulted in improved access to services and better patient care.

Patient Support

Social Services

While the challenges of a cancer diagnosis are overwhelming, the oncology social worker at AdventHealth Cancer Institute Waterman is specially trained to help patients obtain the physical and emotional support they need. A comprehensive network of social services includes psychosocial counseling, support groups, financial and transportation assistance, home care and hospice referrals, and connections to community resources.

Support Groups

- All Cancers Group
- Breast Cancer Group
- Gynecological Cancer Group
- Men's Coffee Group

In 2022, the oncology social worker provided 447 interventions to assist patients with psychosocial emergencies and needs. The following chart shows additional support provided by the oncology social worker in 2022.

Patient Support Data	
Number of patients who had psychosocial distress screenings	212
Number of patients assisted by social worker	150
Number of patients who received transportation assistance	49
Number of patients who received financial assistance	41
Number of support groups held	25
Number of support group participants	104

Community Outreach

AdventHealth Cancer Institute Waterman's annual community outreach activities exemplify our Whole Person Care philosophy and demonstrate our commitment to fostering a healthy community. Some of the activities we provided in 2022 included:

- Community Health Screening and Prevention Events
- Individual Screening Assessments
- Community Lectures and Presentations
- Community Lectures
- Social Media Events

Below is a summary of some of the community outreach events from 2022.

Program	Date	Location	Outcomes
• Pink Out	October	Virtual	• 50,000 reached via social media platforms
• Pink On Parade 5k	October 9	Waterman	• 230 registrants
• Great American Smokeout	November 17	Waterman	• 21 individuals screened for lung cancer risk; 2 referred for low dose CT screening
• Screening Event With Lake Cares Food Pantry	November 18	Martin Luther King Center, Mt Dora	• 5 women referred for screening mammogram and 2 referred for cervical cancer screening

*Patricia Geraghty, MD
Radiologist*

*AdventHealth Waterman is designated as an
American College of Radiology Breast Imaging Center of Excellence.*

American Cancer Society

AdventHealth Cancer Institute Waterman’s partnership with the American Cancer Society provides additional support to cancer patients in Lake County. In 2022, AdventHealth Cancer Institute Waterman was a corporate sponsor (\$5,000) for the American Cancer Society’s Walk for the Cure event in October in The Villages. Through sponsorships such as this, the American Cancer Society provides cancer resources to Lake County residents. Some of these include:

- Cancer educational brochures
- Transportation and lodging assistance
- Health insurance assistance services
- Caregiver resource guides
- Survivorship information

Florida Breast and Cervical Cancer Early Detection Program

AdventHealth Cancer Institute Waterman partners with the Florida Department of Health’s Florida Breast and Cervical Cancer Early Detection program to provide eligible uninsured women in Lake County ages 50 to 64 with free mammograms and diagnostic imaging. In 2022, our breast navigator screened 55 uninsured women for eligibility and provided application assistance for mammogram screening, resulting in 51 women receiving free mammograms through this program. Breast cancer was detected in two of these women who received assistance with obtaining Medicaid and timely cancer treatment. The remaining four women not eligible for this program were provided alternate financial assistance resources.

Philanthropy

Through the generosity of our donor partners, the AdventHealth Waterman Foundation raises thousands annually to help fund valuable services to improve the health of our community.

In 2022, the Foundation raised \$129,385 to support cancer services (including more than \$13,350 raised by other local groups and organizations), with an additional \$98,867 raised through events and promotion.

During 2022, the return of in-person events, such as the annual Pink on Parade 5k and the annual Partners in Caring Golf Classic, allowed the Foundation to engage the community further to support cancer services at a greater level.

Proceeds from these events promote breast cancer awareness and provide financial and educational support for early detection and screening. Proceeds will also help fund upcoming equipment replacements to bring renewed hope to cancer treatment patients.

In 2022, the Foundation received an external grant of \$2,500 from the Florida Society of Clinical Oncology (FLASCO) Foundation to assist cancer patients' unmet living expenses. Transportation to and from treatment continued to be a significant need for some cancer patients who were unable to have means of transportation due to a lack of financial resources and/or access. During the grant period of March 1 through October 15, 2022, five patients were provided with transportation to and from treatment by special transportation services or assistance with their car payment. One patient was assisted with their rent payment..

2022 Contributions and Distributions

Contributions

- Raised by Foundation for cancer services, screening mammograms and cancer benevolent fund..... \$129,385
- Raised by partner organizations
 - o Designated for screening mammograms\$12,969
 - o Designated for cancer benevolent fund\$1,140

Distributions

- Cancer Benevolent Fund\$7,369

Financial contributions directly impact the lives of those battling cancer in Lake County and assist our expert clinical team by providing necessary innovative technology and personalized care to enhance our clinical outcomes, reduce the cost of health care and help cure more cancers. We encourage others to consider contributing and leaving a legacy of hope and healing through the AdventHealth Waterman Foundation.
